Astronomy Test Review

- 1. Why can't sound travel through a vacuum?**
- 2. In a solar eclipse how must the Earth, Sun, Moon be positioned?**
- 3. During which Moon phase does a solar eclipse occur?**
- 4. What is the most massive object in the solar system?**
- 5. Name the Jovian planets:**
- 6. Name the day where the whole world has 12 hours of darkness and 12 hours of day light?**
- 7. Name the shortest day of the year?**
- 8. Do terrestrial planets have rings?**
- 9. What is most of the solar system made out of?**
- 10. What is an astronomical unit?**
- 11. What color shift would we see in a collapsing universe?**
- 12. Which color has the longest wave length?**

Astronomy

My Comfort level with this concept is:

Gravity

I know this much : _____

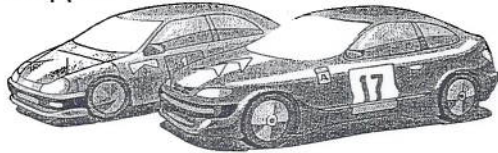

Big Bang

I know this much : _____

Doppler Effect

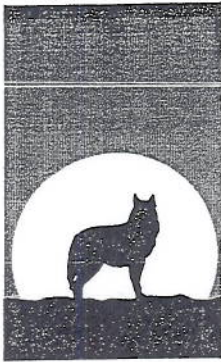

I know this much : _____

Equinox

I know this much : _____

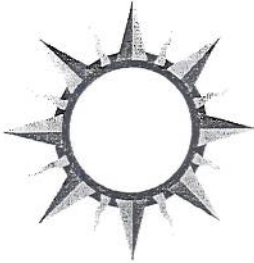

Eclipse

I know this much : _____

Orbit

I know this much : _____

Rotation

I know this much : _____

Revolution

I know this much : _____

Solstice

I know this much : _____
